Implementing grades in python Version 1.0

```
total_points = 0
total_credit_hours = 0

num_courses = int(input("Enter number of courses: "))

for i in range(num_courses):
    print(f"\nCourse {i + 1}")
    course_name = input("Enter course name: ")

    credit_hours = float(input("Enter credit hours: "))
    grade = input("Enter grade : ")
    grade_points = {
        "A": 4.0,
        "B+": 3.5,
        "B": 3.0,
        "C+": 2.5,
        "C": 2.0,
        "D": 1.0,
        "F": 0.0
    }

    if grade not in grade_points:
        print("Invalid grade! Please enter a valid grade.")
        continue

    points = grade_points[grade]

    total_points += credit_hours * points
    total_credit_hours += credit_hours

if total_credit_hours > 0:
    gpa = total_points / total_credit_hours
    print("\n-------------------------")
    print(f"Total Credit Hours: {total_credit_hours}")
    print(f"Your GPA is: {gpa:.2f}")
    print("-------------------------")
else:
    print("No valid courses entered.")
```

```
Enter number of courses: 2

Course 1
Enter course name: DB
Enter credit hours: 4
Enter grade : A

Course 2
Enter course name: AI
Enter credit hours: 3
Enter grade : B
```

```
    -------------------------
    Total Credit Hours: 7.0
    Your GPA is: 3.57
    -------------------------
```
